

ATTENTION!

Our new Carpeting has arrived.

On **May 24th** the installers will begin staging and preparing the carpet and setting up a garbage container on site.

On **May 25th** they will begin the removal of existing carpet and reinstalling of the new carpet.

The installers will start work on **the 4th floor** and work their way down.

HOURS OF OPERATION.

8:00am to 5:00pm

The installers will work towards limiting any inconvenience but you can expect an odor from the low Voc glue. They will mitigate the odor and drying time of the glue with the use of electric fans. The glue dries within 15 minutes so any inconvenience should be very short.

The installers will protect the fresh glue areas with CAUTION tape and signage and will be close by to lay down a carpet path should their work coincide with your need to exit or enter your unit.

We appreciate your cooperation, patience and understanding as we improve the look and feel of our condominium building.

Thank you,
3111 Varsity
